7. The port at Bratislava could load and unload about 12 ships and barges a day, each ship containing from six to seven hundred tons. A total of about six oil tanks could be loaded each twenty-four hours, for a grand total of thirty-six hundred tons.

8. The shipping organization carried steel, coal, and manufactured goods out of Bratisleva and brought in tobacco, wine, iron ore and oil.

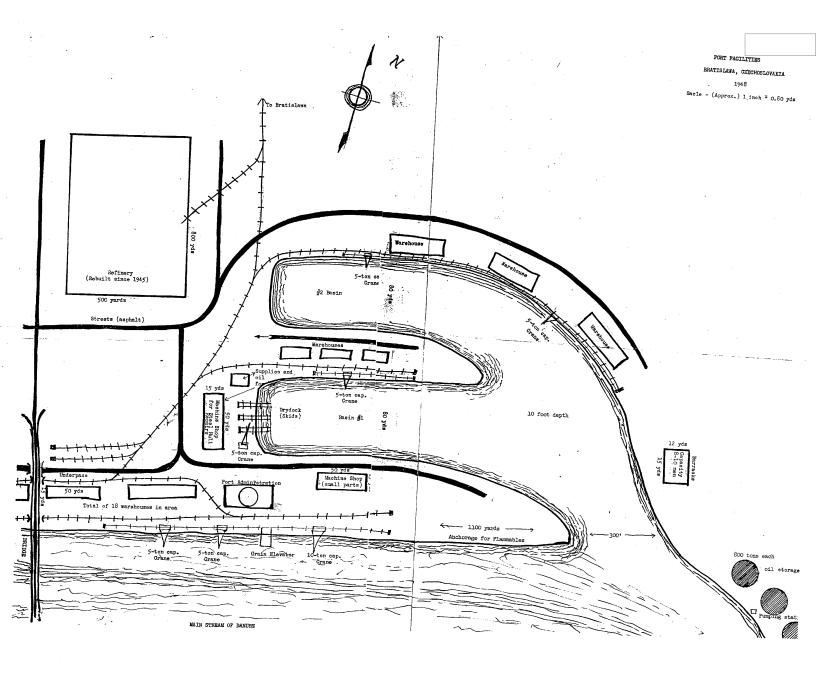

Available at the CIA Library is a sketch drawn by source from memory which shows port facilities, Bratislava, Czechoslovakia
